

# Efficiently deploy ready-to-use temperature-screening kiosks across your various locations

## Multi-function system:

- Temperature screening
- Screening questionnaire for COVID
- Credential authentication
- Access management

AS COVID-19 continues to challenge our healthcare system, this new solution powered by AT&T can act as your first line of defense. With it, you can do temperature screening and present a screening questionnaire for COVID BEFORE guests enter your facility.

### **Solution for patients, employees, and visitors**

Check patients, caregivers, and visitors as soon as they arrive at your facilities. It's fast, contactless, and non-invasive. Plus, it offers authentication of credentials with access management systems, active directories, management alerts, and email platforms.

## Benefits:

- Re-start or maintain operations by enabling a containment strategy
- Control access to your facilities by screening patients, caregivers, and visitors before they enter
- User experience is fast, contactless, and non-invasive
- Helps providers return to normal patient, caregiver, and visitor volumes

## Features:

- Supported by the nation's best and fastest network
- Identity authentication through various form factors
- Temperature screening and screening questionnaire for COVID
- Pass/fail notification based on temperature and screening questionnaire
- Enhanced reporting and access control
- Highly configurable
- Ability to Integrate with existing back-end systems

# Health check

- + access control
- + records integration

# About 5 seconds

to conduct temperature scan read

# About 15 seconds

to complete the whole process

# Near-real time

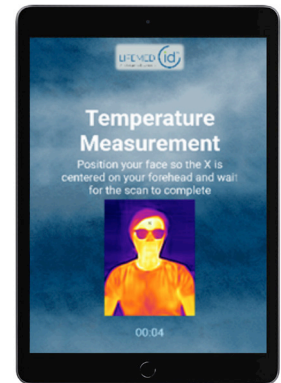

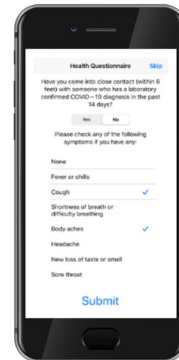

communicated results

## Step 1

### Contactless identity authentication

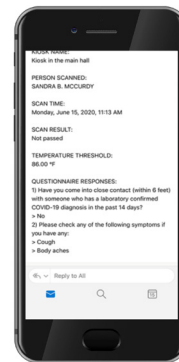

- Existing ID Badges
- QR Codes

## Step 2

### Automatically perform contactless temperature screening and present screening questionnaire for COVID

- Non-invasive temperature screening
- Customized screening questionnaire
- Delivers pass/fail notice in seconds

## Step 3

### Reporting and control access

- Automated alerts to management via email or text

## Help provide a healthy and safe environment for patients, caregivers and visitors

The temperature screening solution powered by AT&T is an end-to-end, integrated, ready-to-use solution that helps you control access to your facilities based on your requirements around temperature screening and responses to screening questionnaire for COVID.

It is available as a stand-alone kiosk or can be integrated into an existing multi-functional kiosk offering a broad range of check-in services.

## The AT&T Business difference: an end-to-end solution

In the healthcare industry it is imperative that most of your time is spent taking care of patients and that you have a reliable network connection. AT&T Business enhances the temperature screening platform with highly secure network connection and other services to support easy setup and management. Also, you will have access to reports that allow you to analyze the screening results by location and create actionable insights to help improve the safety of your facilities. Staging and kitting provides the ability to easily stand up a ready-to-use kiosk.

## End-to-end temperature screening solution

### Reliable mobile connection

The nation's best and fastest wireless network\* with the reliability needed to power the kiosk
